

SONOMA EYE

APRIL 2-5, 2020

**The Fairmont Sonoma
Mission Inn**

100 Boyes Boulevard • Sonoma, California

www.SonomaEye.org

Dear Friends and Colleagues:

It is with great pleasure that we welcome you to the Fourth Annual Sonoma Eye Meeting that will take place at the beautiful Fairmont Sonoma Mission Inn located in Sonoma County, California from April 3 to 5, 2020. As the role of inflammation has been unveiled and solidified across different segments of ophthalmic diseases, from cornea and external diseases, to uvea, retina and vitreous, and to orbit and optic nerve, 2020 Sonoma Eye will again bring together distinguished clinician scientists of different expertise to discuss how inflammation plays a role, peripheral or critical, in the pathogenesis of various ophthalmic diseases from dry eyes to choroiditis, ulcerative keratitis to diabetic macular edema, thyroid eye diseases to giant cell arteritis, glaucoma to macular degeneration. The Scientific Programs will also feature advances in the management of ophthalmic diseases that involve inflammation, including the development of new therapeutic options, targeting inflammatory pathways combined with others such as angiogenesis and vascular adhesion. In addition, the 2020 C. Stephen Foster, MD Lecture at Sonoma Eye will be delivered by a distinguished clinician scientist.

Following the tremendous success of the 2017, 2018, and 2019 meetings, the 2020 Sonoma Eye Meeting will continue to foster and encourage much discussions among authorities in the fields and attendees as we expect much learning and exchange of knowledge to occur throughout the various sessions. In addition, we also dedicate time to less formal yet productive activities for us and our families in fabulous Sonoma Country. Special rates for accommodations have been arranged with The Fairmont Sonoma Inn.

We sincerely hope that you will be able to join us at the Fourth Sonoma Eye Meeting in April 2020!

With warmest welcome,

David S. Chu, MD (New York, USA)
Quan Dong Nguyen, MD, MSc (Palo Alto, USA)
Co-Chairs

WHY SUPPORT AND EXHIBIT AT THE 2020 SONOMA EYE?

The 2020 Sonoma Eye will offer supporters and exhibitors unparalleled opportunity to:

- Interact with the global leaders in the field of ocular inflammatory and infectious diseases affecting the orbit, cornea, optic nerve, retina and choroid
- Face-to-face contact with delegates from around the world
- Increase visibility among Meeting attendees on signage throughout the exhibit hall
- Introduce and promote new products and services
- Be acknowledged in materials included in the registration packet distributed to all attendees
- Sponsor social functions to interact with all delegates in an informal setting
